Summary

Motivated and highly professional Software Engineer with great programming and logical skills. Software Developer with a positive attitude and adaptable approach for every difficult situation. Recently completed Masters of IT (Software Development) from the Swinburne University of Technology

Experience

Hutchison Software - Junior React Developer

May 2021 – Now

React JS Developer

- ❑ Developing reusable React components for Front End
- ❑ Calling API's as per the payload request requirement
- ❑ Extracting JSON data from the API response and using to render the components
- ❑ Working on Components like <MUIDataTable> <TreeView> and others

RESORTer (Melbourne) - Internship

Jul 2020 – Oct 2020

FrontEnd/BackEnd Web Developer

- ❑ Extensive experience in developing web pages from Figma Designs using React JS, Adonis JS and Redux
- ❑ Designed CSS templates for multiple web pages to make them look trendy
- ❑ Used React-Router to get application into Single Page Application
- ❑ Experienced in using React JS components, PUG Integration, Events, Forms, Router and more
- ❑ Components included Button, Input, Drop Down, Label and many more

- ☐ Worked on backend to create and optimize existing API calls
- ☐ Implemented POST, PUT, DELETE and GET requests on the back end side
- ☐ Integrating YouTube API and Zoom API
- ☐ Developed ChatBox interface using React ChatBox Component and socket programming
- ☐ Experience with front-end development with back-end system integration
- ☐ Used JIRA as the bug tracking system to track and maintain the history of bugs/issues on an everyday basis.

Technical Skills

Platforms:	Windows, Mac, Linux
Web Technologies:	HTML, HTML5, XML, CSS, JavaScript(ES6), JSON, GitHub, Node.js, Express JS, Adonis JS, React JS, Redux, AWS
Development Tools:	Eclipse IDE, BlueJ, NetBeans
Programming:	C, C++, Java, Python, php, .NET, MySQL
Other:	Android Studio, Android B4A, Adobe Suite, Cisco Packet Tracer, Sentiance SDK, JUnit, Figma, JIRA

Education

2019-2021:	Master of Information Technology (Professional Computing) Swinburne University of Technology Major: Software Development
2014-2018:	Bachelor of Computer Engineering University of Mumbai - VCET Major: Computer Science

Previous Projects

DEVELOPED A PHOTO ALBUM WEBSITE WITH STORE AND SEARCH FUNCTIONALITY USING AWS

Combined various services provided by AWS to develop a functional Photo Album Website. Services included EC2 Instances, Amazon S3, RDS and others to establish the Web Architecture

- ☐ Rules for each Security groups were examined based on types of Users
- ☐ The inbound and outbound IP ranges systematized valid Website access
- ☐ Integrated php with HTML to incorporate valid upload/download functionality

DEVELOPED AN APPLICATION IN ANDROID STUDIO

Devised an Android Application for a cultural Festival. The application allowed users to buy tickets for various events online. Also, it provided various information about rules and important dates for different events on mobile

- ☐ Formulated and created entire application in Android studio using Java JDK
- ☐ The graphics were instituted using Adobe Photoshop and After effects

Extra-curricular Activities

- ☐ Selected as captain of the Cricket team resulting in the team reaching finals for the first time.
- ☐ Casual Interest in Table Tennis and Chess
- ☐ Midfielder for Football Team during Bachelors with highest assists in team
- ☐ Enjoy occasional Swimming and Running
- ☐ Enjoy playing online Dota and Fortnite during leisure time
- ☐ Passion for finding faults and debugging codes

Referees
